The Fairmont Southampton

The Fairmont Southampton, Bermuda is home to a delicate pink sand beach and the largest meeting and conference facilities in Bermuda. In 2000, the entire hotel was in need of renovations, and similar to its sister property the Hamilton Princess, needed extensive updates done without any disruption to the ongoing hotel operations. Built in the early 1970s, the hotel carried with it a host of operational and physical challenges which had to be addressed through the repositioning exercise. Mark Benoit, under contract to Fairmont Hotels & Resorts, assembled the entire project and construction management team responsible for completing this state of the art project. Over USD\$45M was spent on renovations of impeccable quality and striking finishes, all within a record time of 22 months.
